

# Art wrapped acoustical panels for wall-to-wall and framed applications

## ACOUSTIC ART PANELS (AAP)

### Ink Sonics Sample Kits

Ink Sonics sample kits contain fabric selection book, acoustical panels in 3 different thicknesses and frame samples

### Acoustic Art Panels

Solid Ash, Maple, Black Ash, White Maple  
Standard Sizes:

#### Square

24" x 24", 29" x 29", 39" x 39" 49" x 49"

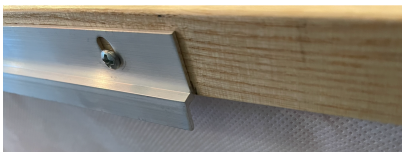

#### Rectangle

29" x 36", 29" x 40", 38" x 47", 39" x 54"  
47" x 58", 47" x 65"

Thicknesses = 1/2", 3/4", 1-1/4"

Custom Shapes & Sizes Available

### Standard Cleat

### Panawall® System

### Acoustics

NRC 0.72 to 1.0

### Reaction to Fire

ASTM E84 Class 'A'  
CAN ULC 102 Class 'A'

### STRUCTURE

Acoustic Art Panels (AAP) are sound-absorbing panels that help to reduce background noise and the reverberation or echo in a space.

The core of our panels is Hemp, an excellent absorber, and the panel contains a cavity within its own thickness delivering excellent absorption performance. When wrapped with nano perforated wood and vinyl or acoustical fabric, the design options are endless.

The panel construction is a wood frame that is faced with a hemp absorber panel and an acoustic liner on the back that conceals the cavity.

### ATTACHMENT OPTIONS

Panels are delivered by default with our standard panel hanger. One half is fixed to the top back frame of the panel and the other to the wall. The panel then sits on the wall cleat. Because of the angle of the cleat, the panel is held tightly towards the wall.

Optionally, Panawall® is a parametric frame system allowing panels to be individually removed as required. Additionally, panels of multiple types and finishes can be installed together on the same frame. Panawall enables reveals to be introduced between panels where required and delivers a deeper air chamber for even better acoustic absorption. The aluminum frames are installed horizontally and the panels backs contain stringers and clips that enable the panel to be hung onto the frames

### FABRIC & DIGITAL OPTIONS

Acoustic Art Panels (AAP) have gallery wrapped edges for abutting edges or hardwood frames.

Choose from hundreds of scalable art options from our own Inksonics library or provide your image/artwork. Inksonics can assist you in acquiring use rights. Our graphics department will prepare the artwork scaled for your project. We can digitally reproduce your image on a wide variety of fabrics, laminates or wood veneer.
